Body Care Section (4 Products)

- 2 Body Lotions (different formulations)
- 2 Body Wash/Shower Gels

Hair Care Section (4 Products)

- 2 Shampoos (different hair types)
- 2 Conditioners (matching formulations)

Website Features & Pages

Customer-Facing Pages

1. **Homepage** - Brand showcase with featured products
2. **Collection Page** - All products with filtering and sorting
3. **Dynamic Product Page** - Detailed product information, images, and reviews
4. **About Us** - Brand story and mission
5. **Policies** - Shipping, returns, privacy policy
6. **Shopping Cart** - Review items before purchase
7. **Checkout** - Secure payment processing
8. **Order Success/Failure** - Transaction confirmation

User Account Features

- **User Registration & Login** - Secure account creation
- **User Profile Management** - Address, contact information
- **Order History** - Track past purchases
- **Account Dashboard** - Personal information management

Admin Features

- **Product Management** - Add, edit, remove products
- **Order Management** - Process and track orders
- **User Management** - Customer support tools

Technical Specifications

Technology Stack

- **Frontend:** HTML5, CSS3, Tailwind CSS (modern, responsive design)
- **Backend:** Python Django (robust, secure framework)
- **Database:** SQLite (scalable to PostgreSQL if needed)
- **Payment Gateway:** Razorpay/Stripe integration
- **Delivery:** API integration with delivery service
- **Security:** SSL encryption, secure payment processing

Key Technical Features

- **Responsive Design** - Works perfectly on mobile, tablet, and desktop
- **Fast Loading** - Optimized for speed and performance
- **SEO Optimized** - Search engine friendly structure
- **Security** - Industry-standard security measures
- **Scalable** - Can grow with your business

Development Timeline

Phase 1: Foundation (Weeks 1-4)

- Project setup and basic structure
- Database design and implementation
- Homepage and basic navigation

Phase 2: Product Showcase (Weeks 5-8)

- Collection page with all products
- Individual product pages
- Category filtering and search

Phase 3: User System (Weeks 9-12)

- User registration and login
- Profile management
- Security implementation

Phase 4: Shopping Experience (Weeks 13-16)

- Shopping cart functionality
- Checkout process
- Order management system

Phase 5: Payment & Admin (Weeks 17-20)

- Payment gateway integration
- Admin panel development
- Order processing workflow

Phase 6: Final Integration (Weeks 21-24)

- Delivery service integration
- Testing and bug fixes
- Performance optimization

Phase 7: Launch (Weeks 25-26)

- Final testing
- Deployment to live server
- Training and handover

Design & Development

✓ Custom responsive website design ✓ Professional product photography integration ✓ Mobile-optimized interface ✓ Cross-browser compatibility ✓ Fast loading optimization

Functionality

✓ Complete shopping cart system ✓ Secure payment processing ✓ User account management ✓ Order tracking system ✓ Admin management panel ✓ Email notifications

Technical Setup

✓ Domain setup assistance ✓ Hosting configuration ✓ SSL certificate installation ✓ Database setup and migration ✓ Payment gateway configuration

Post-Launch Support

✓ 30 days free bug fixes ✓ Basic training on admin panel ✓ Documentation and user guides ✓ Technical support during launch

Investment & Payment Structure

Total Project Cost: ₹2,00,000

Payment Schedule

- **Phase 1 (25%):** ₹50,000 - Project commencement
- **Phase 2 (25%):** ₹50,000 - Product pages completion
- **Phase 3 (25%):** ₹50,000 - User system & cart completion
- **Phase 4 (25%):** ₹50,000 - Final delivery & deployment

Why This Represents Excellent Value

Market Comparison:

- Similar projects typically cost ₹3-5 lakhs
- Agency pricing would be ₹5-8 lakhs
- You're getting professional-grade development at startup-friendly pricing

Features Included:

- Payment gateway integration (₹40,000 value)
- Custom admin panel (₹30,000 value)
- User management system (₹30,000 value)
- Delivery API integration (₹25,000 value)
- Responsive design (₹20,000 value)
- Advanced security features (₹15,000 value)
- Total market value: ₹3+ lakhs

Project Deliverables

Technical Deliverables

- Complete source code
- Database with all product data
- Admin panel access
- Payment gateway integration
- Delivery service integration
- Mobile-responsive website

Documentation

- User manual for admin panel
- Technical documentation
- Maintenance guidelines
- Security best practices
- Backup procedures

Training

- Admin panel training session
- Content management training
- Order processing workflow
- Basic troubleshooting guide

Success Metrics

We commit to delivering:

- **99.9% uptime** during business hours
- **Page load speed** under 3 seconds
- **Mobile responsiveness** across all devices
- **Secure payments** with industry standards
- **SEO-optimized** structure for search visibility

Next Steps

1. **Contract Signing** - Finalize agreement and timeline
2. **Advance Payment** - 25% to commence development
3. **Requirement Gathering** - Detailed discussions on preferences
4. **Design Mockups** - Visual concepts for approval
5. **Development Start** - Begin coding and implementation

Why Choose Us

- **Transparent Pricing** - No hidden costs
- **Regular Updates** - Weekly progress reports
- **Quality Assurance** - Thorough testing before delivery
- **Post-Launch Support** - 30 days free support
- **Scalable Solution** - Can grow with your business

Terms & Conditions

- Project timeline: 26 weeks from commencement
- Payment terms as outlined above
- Source code ownership transfers upon final payment
- 30 days free support post-launch
- Additional features can be added as per separate quotation
